ACTIVITIES AND PROJECT

Auto Parts Catalog (MERN)

April 2023 - May 2023

- Developed an auto parts catalog using the MERN stack, which allowed users to search and view auto parts.
- Implemented a server and database infrastructure using Express.js and MongoDB, seamlessly integrated with a React app for a responsive user interface, leveraging Axios for API interactions and React components.

Clothing Website

October 2022 - November 2022

- Developed an e-commerce website using SQL database and PHP with a front-end using HTML and CSS.
- Implemented an admin login feature to track purchases and manage inventory.

CERTIFICATION

SQL for Data Science certified by IBM
Introduction to JavaScript by Sololearn
JavaScript Intermediate

January 2023 - March 2023
November 2023 - November 2023
November 2023 - December 2023

TECHNICAL & COMMUNITY VOLUNTEERING

Technical Analyst, Technical Service Department, Palatine, IL

February 2020 - March 2020

- Managed library catalog records and electronic resources, facilitating user searchability.
- Supported library operations, including item maintenance, database utilization, and event coordination.

BMI – Black Male Initiative

- Managed and trained new volunteers and educated them to develop a strong commitment to community service.
- Assisted with meal preparation, dish out meals, and clothes to over 40 people per day.
